This module includes activities that are designed to develop and reinforce several locomotor and manipulative skills. All of the basic locomotor skills, static and dynamic balancing, as well as underhand tossing, rolling, and catching are addressed. Other learning outcomes are also addressed within the module’s activities.

- **Standard 1 [K.a,b,c,e,g,h,i]** Demonstrate and differentiate between walking, running, hopping, galloping, and jumping (a); Demonstrate bending, pushing, pulling, turning, and balancing on one foot (b); Demonstrate approaching-mature form (at least two critical elements: which are small, isolated parts of the whole skill or movement) used in stationary manipulative skills for tossing and throwing underhand to targets, bounce and catch, toss and catch, kicking stationary ball to target, striking stationary object with paddle, dribbling, rolling ball underhand to target, trapping and volleying with hand (c); Demonstrate moving to a beat and to rhythmic patterns using basic locomotor and nonlocomotor rhythmic patterns (e); Demonstrate moving at low, medium, and high levels (g); Demonstrate traveling in straight, curving, and zigzagging pathways (h); Demonstrate fast, slow, and moderate speeds (i).

- **Standard 1 [1.a,b,c,f,i,j,k]** Demonstrate critical elements used and distinguish between galloping, leaping, skipping, and sliding (a); Demonstrate non locomotor skills of twisting, curling, bending, stretching, and balancing on different body parts (b); Demonstrate approaching mature forms (at least two critical elements) for use in manipulative skills (e.g., rolling ball underhand to target, underhand throw to targets, underhand toss and catch to self and with a partner, dribbling with hand in general space, dribbling with foot, kicking stationary ball to target, striking stationary object with hand or with short-handled implement, throwing underhand, volleying object upward with various body parts) (c); Demonstrate moving to a beat or rhythmic pattern in personal (self-space) and general space (f); Demonstrate low, medium, and high levels (i); Demonstrate straight, curving, and zigzagging pathways (j); Demonstrate fast, slow, and moderate speed movements (k).

- **Standard 1 [2.a,c,d,e,f]** Demonstrate individually and with a partner the mature forms of manipulative skills for underhand throwing, catching underhand tossed or thrown ball, kicking/passing stationary ball to a partner or to a target, foot dribble with control while walking, striking, consecutive upward volleying with hand(s), and stationary hand dribbling (a); Demonstrate moving to a rhythm by performing basic dance sequences (teacher- or student-led dances) (c); Demonstrate mature form for hop, jump, leap, skip, run, jog, gallop, and slide (d); Demonstrate and differentiate between jogging and running (e); Demonstrate manipulative skills using increased force (hard) and decreased force (soft) with control (f).

- **Standard 2 [K.d]** Demonstrate the concept of personal space (d).

- **Standard 2 [1.e]** Demonstrate appropriate use of personal and general space (e).

- **Standard 2 [2.a,b]** Describe the concept of relationships (e.g., over, under, around, in front of, behind, through) in dynamic movement situations (a); Explain the importance of spatial awareness (personal and general space) in static and dynamic movement situations (b).

- **Standard 4 [K.a,b,c]** Demonstrate cooperative and safe play (a); Demonstrate general and personal space (b); Identify three classroom (procedural) rules (c).

- **Standard 4 [1.a,b,c,d]** Work cooperatively, and demonstrate safe equipment use with peers (a); Demonstrate safety rules for activity (b); Demonstrate safe use of space (c); Identify classroom (procedural) rules (d).

- **Standard 4 [2.c,d,e]** Demonstrate cooperative skills, to include taking turns and sharing equipment (c); Demonstrate safe participation individually and with others (d); Identify two class safety rules (e).
Each skill-building activity in this module is meant to be one part of a complete lesson. The authors recommend the following formula for creating a 30 to 45 minute lesson:

- Instant Activity (not on block plan) 5-10 minutes
- + Skill Activity with Debrief 10-15 minutes
- + Skill Activity with Debrief 10-15 minutes
- + Check for Understanding 5 minutes

**Important:** Suggestions are what they say they are – *suggestions.* All OPEN materials are offered in MS Word format so that you can easily modify our suggestions to meet the needs of your students.

Two assessments are provided as a part of this module. However, there are many different ways for teachers and students to assess and evaluate student learning and skill development.
There are 3 pages of simple self-assessments provided with this module, giving each student a structure for reflecting on current skill level, setting a goal for growth and development, and then reassessing progress toward that goal.

The authors recommend that students complete these forms as a pre-assessment on the day that skills are first introduced. For example, during the module’s first lesson, students explore movements using juggling scarves. At the end of this activity, students would complete the Pre and Goal columns for any or all of the basic locomotor skills. Pre-assessments for other skills would not be completed until a future lesson. A post-assessment for all skills would then be completed during the Module’s Station Day lesson.

Introduce the self-assessment tool and process to K-1 students by completing the worksheet as a class, rating the entire group’s performance. Next, set a group goal for improvement and complete the post-assessment together. Young students will most likely need too much guidance to complete this type of assessment independently. We recommend attempting an independent self-assessment at the end of grade 1 and then throughout grade 2.

When evaluating a student’s performance in using the Self-Assessment Worksheet, the student’s score should be based on the process and quality of self-reflection, not the student’s ability to score a full column of smiles or stars. Here is a sample rating scale for self-assessment evaluation:

- **Well Below Competence (1):** Was present, but refused to complete Self-Assessment.
- **Lacks Competence (2):** Completed each assessment with little effort. Student pre- and post-assessments do not match teacher-observed skill performance.
- **Competent (3):** Most skill assessments match the student’s skill level with a goal for improvement and an accurate post-assessment. Evidence of reflection is present.
- **Proficient (4):** All skill assessments match the student’s skill level with a goal for improvement and an accurate post-assessment. Evidence of reflection and a regard for quality of work is present.

**NOTE:** The evaluation scale suggested for the Self-Assessment Worksheet is consistent with the scale used for the Holistic Rubrics discussed below. This consistency allows teachers to average several scores for the sake of a final evaluation or grade.

The Holistic Rubric can be used as both a formative and summative assessment within the module. Providing students with the rubric’s criteria early in the module will allow for discussion and formative evaluation throughout activities and lessons.

This rubric can be completed in full on the Module’s Station Day, providing a final holistic evaluation of each student’s performance.

**TEACHING STRATEGY FOCUS**

**Identify Critical Content:** As you begin to teach locomotor skills it’s important to take the time to define the elements of each one. This will help students connect concepts with their performance. Start slowly and add different skills over time, when it’s developmentally appropriate for your students. Likewise, helping students examine the differences and similarities between the skills will allow them to understand how and why each skill can be applied.

- DOK 3: How does it make you feel if someone moves into your personal space? Why?
- DOK 3: If general space was crowded, describe some of the things you’d have to think about as you moved through the space.

**TEACHING STRATEGY FOCUS**

Help students elaborate on content: Helping students elaborate and expand on their original thinking can be as simple as asking the question, “why?” As student process and make specific inferences prompt them to think even deeper and provide evidence to support their answers.
STUDENT TARGETS

- **Skill:** I will keep the beanbag under control as I toss it in the air.
- **Cognitive:** I will discuss the different locomotor skills that I used in class.
- **Fitness:** I will work to stay actively engaged during all of the beanbag activities.
- **Personal & Social Responsibility:** I will use the equipment and activity space appropriately.

TEACHING CUES

Review content: Now that students have worked with and explored several different locomotor skills it’s important to review what they’ve learned in order to highlight the idea that they are building their “movement vocabularies.” Provide activity time in which all students choose their favorite movement and share the ways they’ve discovered their new skills can be used.

- DOK 2: What do you know about the word mature?
- DOK 3: How are skill cues related to mature skill performance?
- DOK 1: How do you recognize when people are sharing equipment in physical education?
- DOK 2: How does sharing equipment affect our ability to learn new skills in physical education class?

**TEACHING STRATEGY FOCUS**

Help students practice skills: In order to develop mature skill patterns students need time to practice and develop their abilities. Although you may feel like you need to cover a certain amount of content in a short timeframe, sometimes it pays to be patient, practice and review skills and cues in order to help students to progress toward desired outcomes. Underhand tossing is a good example of a skill that might be covered quickly with few students truly reaching set targets and outcomes. However, if students are provided an ample amount of deliberate practice time, skill and concept transfer will strengthen future development down the road.
STUDENT TARGETS

- **Skill:** I will keep my ball under control as I work to toss and catch it.
- **Cognitive:** I will demonstrate the difference between clockwise and counter clockwise using the ball.
- **Fitness:** I will work to stay active during all activities.
- **Personal & Social Responsibility:** I will listen to feedback from my teacher and work to make my performance better based on suggestions.

- Remove challenges that involve catching. Allow tosses to fall to the ground.

**MODIFICATIONS**

**STANDARDS & OUTCOMES ADDRESSED**

- Clockwise, Counter-Clockwise, Control, Demonstrate, Direction, Manipulative Skill

**DEBRIEF QUESTIONS**

- DOK 1: What does clockwise mean? Counter-clockwise?
- DOK 2: Why is it important to know the difference between the two directions?
- DOK 3: What might happen if everyone in our class were trying to move around the activity area and we didn’t know the difference between clockwise and counter-clockwise?
- DOK 1: What does control mean?
- DOK 2: What are the different things that we control during physical education class? What things do we control during the school day?

**TEACHING STRATEGY FOCUS**

Help students examine their reasoning: The word control can mean different things in different contexts. Prompt students to explore those various meanings and listen attentively to their responses. As you listen, carefully question the logic that students use within their answers and prompt them to examine their overall logic. This requires careful interaction between teacher and student, but is essential to applying rigor in a developmentally appropriate way.
STUDENT TARGETS

- **Skill:** I will use the cues for underhand tossing during partner activities.
- **Cognitive:** I will be able to repeat the cues for tossing.
- **Fitness:** I will work to stay actively engaged during all activities.

1. Today we’re going to have more fun exploring movement with foam balls.
2. I will show you a movement activity, and then you’ll repeat after me. As we move through space, we’ll work to move our bodies to the rhythm of the music.
3. Teachers, use the following activity sequence: 1) Rolling Around; 2) Partner Passes; 3) Double Trouble (Grade 2).

**Grade Level Progression:**

**K:** Focus on underhand tossing with opposition as well as safe and controlled travel in general space.

**1st:** Introduce strong and light force during rolling and tossing activities. Emphasize critical elements of underhand throw.

**2nd:** Prompt students to focus on a mature underhand throwing pattern along with gradual variations in both speed and force.
**Ball Skills 2**

**Challenge Progressions**
- Progressively increase the distance between students as they toss and catch the ball.

**Modifications**
- Allow all students to choose whether to work with a ball or a scarf during toss and catch activities.

**Academic Language**

- **Control, Demonstrate, Direction, Effort, Manipulative Skill, Mature, Relationship**

**Standards & Outcomes Addressed**
- **Standard 1 [2.a]** Demonstrate individually and with a partner the mature forms of manipulative skills for underhand throwing, catching underhand tossed or thrown ball, kicking/passing stationary ball to a partner or to a target, foot dribble with control while walking, striking, consecutive upward volleying with hand(s), and stationary hand dribbling (a).

- **Standard 4 [2.d,e]** Demonstrate safe participation individually and with others (d); Identify two class safety rules (e).

**DOK Questions**
- **DOK 1**: What are the cues for underhand tossing?
- **DOK 1**: What is a manipulative skill?

- **DOK 2**: How is underhand tossing similar to/different from other manipulative skills?
- **DOK 3**: How is effort related to skill cues when tossing a ball?

**Teaching Strategy Focus**

- **Help students revise knowledge**: Most students have had some sort of interaction/play experience with a ball. Oftentimes this interaction is generally positive. However, most students will come to physical education with bad habits with respect to tossing, throwing, and catching. Helping them identify and correct errors and bad habits is critical to developing mature skills. While you’re correcting these errors try to infuse new content into your interaction. Work to help students view each skill from an alternative perspective in order to overcome resistance to change.
STUDENT TARGETS

- **Skill**: I will work to maintain my balance during all movement activities.
- **Cognitive**: I will define and discuss balance.
- **Fitness**: I will work to increase my heart rate during movement activities.
- **Personal & Social Responsibility**: I will work safely by following all instructions.

TEACHING CUES

- **DOK 2:** How does a base of support affect balance?
- **DOK 3:** (Demonstrate different bases of support) Do you think this balance pose is a good base of support? Why or why not? How could we improve it?

Teaching Strategy Focus

Manage response rate with tiered questioning techniques: Each set of debrief questions in this module works to move students from Depth of Knowledge (DOK) Level 1 to Level 3. This type of purposeful scaffold helps deepen student thinking about the content that is presented. Engage the students with your own active listening so that they can see and hear your participation. Young students often crave that level of engagement, and their cognitive and skill development will benefit from this type of interaction.
**STUDENT TARGETS**

- **Skill**: I will perform skill assessments to the best of my ability.
- **Cognitive**: I will follow the instructions on each station card in order to stay actively engaged with my team.
- **Fitness**: I will find my pulse/heart rate after each station to see if it is beating faster than when I’m sitting or resting.
- **Personal & Social Responsibility**: I will follow the rules and parameters of the Station Day learning environment.

**TEACHING CUES**

- Start Activity With Music
- When Music Stops: Clean the Area and Rotate

**ACTIVITY SET-UP & PROCEDURE**

**Equipment:**
- Station music and music player
- See station cards for equipment needs

**Set-Up:**
1. Create 6-10 grids (depending on size of class and activity area).
2. Set up station cards in each grid.
3. Set up each station according to its station card.
4. Designate one station as an assessment station.
5. Create groups of 2-4 students, each group at a different station.

**Activity Procedures:**
1. Today is a Station Day. We’ll complete each station for 2 (or 3) minutes. One station is an assessment station, where you’ll be given feedback based on your skill performance.
2. *Teacher: Talk through and/or demonstrate each station. Emphasize expectations at the assessment station.*
3. When the music starts, begin working at your station. When it stops, you’ll have 1 minute to clean up the station equipment and rotate to the next station. Wait until the music begins again before you start the activity at the new station.
4. While we’re learning this station format, I’ll pause the music for a longer period of time so that every team is able to clean up their area and rotate.
Organizing students to interact with content: The use of grids to organize students into learning stations is an effective way to manage activity, assessment, and cooperative learning opportunities. Practice using this format several times, especially with young children, before attempting to facilitate an assessment experience. Students need time to master the management aspects of station work. However, once this routine is learned, it often becomes an essential management tool in physical education.
**FOCUS OUTCOMES**

- **Standard 2 [K.d]** Demonstrate the concept of personal space (d).
- **Standard 2 [1.e]** Demonstrate appropriate use of personal and general space (e).
- **Standard 2 [2.a,b]** Describe the concept of relationships (e.g., over, under, around, in front of, behind, through) in dynamic movement situations (a); Explain the importance of spatial awareness (personal and general space) in static and dynamic movement situations (b).

- **Personal & Social Responsibility**: I will demonstrate safe behaviors without being reminded by a teacher.

**ACADEMIC LANGUAGE**

- Self-Space
- General Space
- Locomotor Skill (Along with cards for individual skills)
- Pathways

**SELECTED ASSESSMENT**

- Student Self Assessment (Locomotor Skills)
Scarves are set out inside 4 large hoops that are scattered around the perimeter. Music is playing as students enter. They collect 1 or 2 scarves and begin to experiment with scarves while scattered self-space.

While in self-space, “Freeze” to stop student movement and focus attention on teacher. Begin activities listed on Activity Card starting with Shapes and Directions. “Freeze” to stop and debrief after Shapes and Directions.

K & 1: Begin by reviewing locomotor skills (see cue posters and teach sheets)
2: Review Scarf Activities, add skipping to the progression, and then progress to Tail Tag.

What does self-space mean? How is that different from general space?

Point to your right. Point to your left. Use your scarf to draw a circle using a clockwise motion.

Why is it important to know and understand directions like right and left, clockwise and counter clockwise?

What is a locomotor skill? What are the different locomotor skills that you’ve learned?

How is walking different than galloping? How are they the same?

Complete the Student Self Assessment (Locomotor Skills) as a class. Project the assessment document via the LCD projector.

• Walk around the activity area and count all of the bean bags.  
• Jog in the area. On signal, freeze and point to any beanbag.  
• Gallop in the area. Freeze, listen for a color, and then find a beanbag that color and touch it with your toe.  
• Leap over beanbags in area.  
• Slide (jump, hop, skip) in the area. When music stops, find a new bean bag and stand on it. | Travels in Relationship with Objects |
| Toss and Try | Toss bean bag straight up and then:  
• Clap 1 time before it hits the floor.  
• Clap 1 time and then try to catch it.  
• Clap as many times as you can before it hits the floor.  
• Clap as many times as you can and then try to catch it.  
• Toss with right hand only (repeat tasks above)  
• Toss with left hand only (repeat tasks above)  
• Toss and turn 360 degrees before the bean bag hits the floor.  
• Start with the beanbag on top of your foot. Flip it into the air and try to catch it. | Catches a Soft Object |
| Super Moves | With bean bag on the floor:  
• Stretch your body and log roll over it back and forth.

• Sit on the floor. Stretch and curl by picking the beanbag up with your feet, reaching and touching it with your hands, and then stretching and setting it back down. | Demonstrates Twisting, Bending, Stretching |
| **PART 2**    |             |               |
| Balancing Act | With bean bag balancing on head, shoulders, or back:  
• Balance on one foot. Shift to balance on the other foot.  
• Sit and then stand again. If the beanbag falls, try again.  
• In plank position, slowly slide your feet around in a circle. | Weight Transfer and Balance/Stability |
| Slow and Fast | • Use your foot to slowly slide the bean bag around the activity area.  
• Slide the bean bag on the ground, back and forth from hand to hand. How fast can you make the bean bag slide while keeping it under control? | Differentiates between fast and slow speeds and strong and light force. |
| Target Practice | Each student finds a spot on the wall as a target (e.g., a brick, piece of paper, etc.) Toss the bean bag underhand to:  
• Hit the center of the target.  
• Hit the edges of the target.
