

Cancer Assignment Sheet

Teachers: **Jennifer Hvozdovic**, **Dennis Green**

GROUP ASSIGNMENT

You and your research team work in Washington DC at the Hvozdovics Institute for Diseases. It is your **BIG DAY** because Congress has decided to hear your teams presentation on the disease that you all have been researching for some time now. Your task is to gather your information and write a report to present to Congress.

Congress has set guidelines for your team to follow. This is to ensure that all the information is covered and done in the right format before presenting on Capital Hill. These guidelines are as follows:

FORMAT GUIDELINES FOR FINAL PAPER

- Cover page [include disease name, team members names, class period, and date].
- Report has to be 3 - 4 pages long, double spaced and typed.
- Report has to have 3 references [at least 1 reference has to be from the internet].
- Make sure that all work is your own and not copied from the references.

INFORMATION TO INCLUDE IN PAPER

- Give a definition and an explanation of the disease.
- Describe how a person becomes infected with the disease??
- Describe the symptoms a person would experience with this disease and how long it would be before these symptoms would appear.
- Describe how this disease is treated?

Submitted by **Jennifer Hvozdovic** and **Dennis Green**. Jennifer is a Masters student in the Health and PE Program at Virginia Tech. Dennis is an assistant principal in Carrol County, VA. Thanks for contributing to PE Central!
