

Check out the story behind the evolution of this resource here:

<https://slowchathealth.com/2017/02/14/story-cubes/>

Print out on stiff card. Poke a matchstick through the center. Spin the spinner, your icon will be the one at which the spinner comes to rest. These are easier to create than the '*story cubes*', which can be found at the link mentioned above.

You can use these *story spinners* in a variety of ways in class.

1: Spin all 9 *story spinners*. Choose an image to start your story/narrative and then continue, linking each of the 9 face up images.

2: Think of a health theme or topic. Spin all 9 *story spinners* and try to weave them into the chosen title or theme.

3: Divide the spinners between a group of students. First spins their *story spinner* to start the story/narrative. The next player in the group spins their *story spinner* and builds upon the story. You can stop after 9 spins, or keep the rotation going if the students can confidently continue with the activity.
