

Grade 7 Sample Lesson Plan: Overview

SOLs

- Analyze the benefits of stress management and stress-reduction techniques.
- Recognize harmful and risky behaviors.
- Develop strategies for coping with disappointment.
- Identify physical, social, and emotional factors that affect school success.
- Identify the benefits of healthy interpersonal relationships.
- Recognize the impact of difficult family situations on physical, social, and emotional health.
- Explain the benefits of emotional flexibility, stress management, and stress-reduction techniques for emotional health.
- Develop achievable goals for handling stressors in healthy ways.
- Explain the importance of a positive (emotionally safe) school climate for school success.
- Create strategies to address differences between family values and beliefs and those of friends.
- Promote strategies for coping with disappointment and adversity.
- Promote help seeking for mental health concerns.

Note

The following activity ideas and lesson and information resource links address the SOLs that support the social and emotional development of students.

The contribution teachers make to the social and emotional development of students is affected by how teachers themselves role model pro-social and emotional regulation skills; supportive interaction with students by educators, health, and counseling staff; and the larger community, school, and classroom climates - perhaps even more than implementation of any specific focused lesson. Lastly, these SOLs should be addressed in concert with the other SOLs, - e.g., healthy relationships and violence prevention, ATOD, and health promotion - that address components of social and emotional development of students – i.e., their ability to experience, express and manage their emotions; to communicate, collaborate, resolve conflicts; and to otherwise develop and maintain positive, supportive relationships with others.

Student Activity Ideas:

1. Implement lessons and activities in resource section.
2. Discuss the differences between constructive and unconstructive criticism, and have students role-play responses to positive and negative criticism.
3. List put-downs and explain why they are inappropriate and make other people angry.
4. Discuss and practice the factors that contribute to group success.
5. Role-play situations where students are teased and laughed at and how to be a helpful bystander.
6. Kindness is the most basic social emotional support. *Nice Compliments Icebreaker* – The teacher has students stand in a circle. The teacher provides the first student with a ball while giving the student a compliment. That student then hands, rolls or throws the ball to the next student and says something nice about that student and so on and so forth (<http://www.partygamespond.com/say-something-nice>). This activity can also be done by tossing bean bags, or as cooperative activity where students unroll a ball of string, passing the string and nice comments from one student to another to co- create a large “spider’s web” (<http://lessons.atozteacherstuff.com/92/group-cooperation>).
7. Communication undergirds social emotional development. Implement the class activity, *Communication Drawing* http://www.educationworld.com/a_tsl/archives/02-1/lesson020.shtml. Pair up students and give them 4 blank pieces of paper and drawing instruments. Have the students sit back to back. Give the first student in each pair 2 minutes to draw a picture on the paper. These students will slowly describe their drawing to their partner and the partner should follow their instructions try to replicate the original drawing – no questions are allowed! Once this is done, the students should compare the two drawings. Discuss what was helpful or challenging in communicating without seeing the drawing. Repeat the activity, but instead have the partner’s switch roles. In this second round, however, the second student can also ask the partner questions (but only questions that have a yes/no answer) to clarify how their partner is telling them to draw. Have the students compare the pictures and discuss. Were the second set of drawings closer to the original? What may have contributed to this? Was additional communication helpful? How so?
8. Discuss family and peer relationships and have students describe benefits of strong relationships.
9. Provide examples of difficult family situations (abusive behavior, financial problems, separation or divorce, illness, injury or death, loss of job, family has to move, birth of a baby, remarriage, etc.).
10. Have students discuss the effect that the difficult situation is having on each family member, and suggest ways each family member may cope with the situation.
11. Create and read two scenarios where a child experiences disappointment; in one scenario the where the child handles it inappropriately and in the other scenario the child overcomes disappointment in a positive manner. Have students discuss the pros and cons

of each ending. Have students further illustrate or act out constructive ways of dealing with disappointment.

12. Encourage students to talk to trusted adults about disappointments, loss and grief. Talk to them about helpful school and community resource people. *When Grief Enters the Classroom* is a resource that provides good background and strategies for educators on addressing grief across various developmental ages.
http://www.rcsdk12.org/cms/lib04/NY01001156/Centricity/Domain/12/District%20Links%20documents/grief_guide.pdf.
13. Self - Esteem/ My Positive Traits http://www.educationworld.com/a_lesson/self-estate-positive-character-traits.shtml Students work together to create a class social media or Instagram account with pictures and captions that reflect their positive traits.
14. Journal for a one-week period about situations that cause stress.
15. Stress Management - Discuss stress management strategies and have students exercise a strategy of their choosing for a 2 - 5 minute time period in the class (i.e., physical or creative expression, talking, breathing).
16. Striking Out Stress – A Gallery Walk Activity
http://www.educationworld.com/a_tsl/archives/02-1/lesson045.shtml

The teacher puts up several posters around the room. After an interactive discussion about the definition of stress and the impact of the “fight or flight” response on health, students walk around the room and jot down answers to each poster. The teacher and students then discuss the responses and identify positive and negative stressors. When the students return to their seats, the class brainstorms strategies for coping with stress. Following are sample poster headings:

- Situations that make me angry.
- Situations that make me frustrated.
- Situations that make me worry.
- Situations that make me happy.
- Situations that take a lot of time.
- Situations that take money.

17. Help students practice mindfulness. Per Kellie Edwards, Kids Activities Blog <http://kidsactivitiesblog.com/60980/5-mindful-games-kids>, mindfulness is about paying attention to the here and now; rather than being distracted— slowing down and experiencing stillness to quiet the mind. The benefits to children include: improving observational skills and concentration; allowing a time to regroup and wind down – giving brains and bodies time to renew; feeling steady and safe; soothing emotions; feeling kind and connected. The following are examples of activities that focus students on the present and contribute to mindfulness:
 - Blowing bubbles – encourage students to breath in deep and out slowly, and focus on the bubbles’ gentle movements.

- Pinwheels – encourage students to breath in deep and out slowly and focus on the pinwheels 'movements.
- Playing with balloons – each child pushes a balloon gently into the air and tries to keep it afloat and within reach.
- Texture bag – place a sampling of small, familiar objects of various textures (e.g., rock, stick, leaf, acorn, marble, squishy toy, fluffy toys) into a bag; have students take turns touching and feeling the items in the bag without taking them out, describing how the object feels, and guessing what the object is.
- Blindfolded taste test – depending on the school's policies related to food items, students take turn being blindfolded and then feeling and tasting a variety of fruits, vegetables, or other foods . In turn, students describe how the food items feel and taste – and then remove their blindfolds and describe what they see.
